

Storage Conditions and Shelf-Life Declaration

MANGPOL PP

The shelf-life of polypropylene depends on various factors such as storage conditions, packaging and how it is handled, which are user dependent. Mangpol polypropylene resin is stabilised with basic antioxidant package for shelf-life.

The exact shelf life of polypropylene cannot be defined but for the interest of the buyer and or processors, Mangpol shelf-life is 12 months from the date of manufacturing if it is stored in a dust free storage area where the temperature is not more than 40deg.C and should not expose to direct or indirect sunlight, Hot air, radiation, direct chemical contact, chemical fumes or smoke, direct heat or heat radiating devices, ozone gas or ozone generating electrical devices, etc.

The above given statement is valid only for material stored in original intact package and without any damage to the package.

Consult relevant Mangpol grade Material Safety Data Sheets for more specific information.
